

BT Total Return Fund

Fact Sheet November 2011

ARSN: 092 178 704

About the Fund

The BT Total Return Fund is a multi-manager fund of hedge funds that invests across a range of absolute return strategies. The Fund may also employ exchange traded or over-the-counter derivatives to gain exposure to absolute return investment or to manage risk.

What type of investor may be suited to the Fund?

The Fund may be suited to individuals or institutions seeking to diversify part of their investment portfolio by introducing an asset class that is not expected to be directly correlated to the share, property and fixed income markets.

Fund objective

The Fund aims to provide a return the equivalent of cash +3% to 5% per annum (pa) net of fees over rolling three year periods. Returns are expected to have a low correlation to traditional asset classes.

Investment strategies

The Fund invests with managers that execute a range of investment strategies which may include:

- Equity Long-Short: investing in a core holding of long equities hedged at all times with short sales of stocks and/or stock index options
- Equity Market Neutral: seeks to profit by exploiting pricing inefficiencies between related equity securities, neutralising exposure to market risk by combining long and short positions
- Convertible Bond Arbitrage: purchasing of convertible securities, generally convertible bonds, and hedging the equity risk by selling short the underlying common stock
- Merger (Risk) Arbitrage: investment in event driven situations such as leveraged buyouts, mergers and hostile takeovers.
- Fixed Income Arbitrage: profiting from price anomalies between related interest rate securities. Strategies include interest rate swap arbitrage, arbitrage of mispricing between futures and physicals, and long-short strategies.

Performance summary

The Australian equity market (All Ordinaries Accumulation Index) fell 3.43% in November, with the European sovereign debt crisis continuing to dominate the headlines. The ASX200 remains highly sensitive to global macro movements, as reflected in the outperformance of defensive domestic sectors against the underperformance of Financials and Materials.

The portfolio ended flat for the month and up 2.4% (post-fee) for the year against a much weaker equity market which is down almost 6%. The underlying strategies posted mixed results for the month. The market neutral strategies performed well which helped to offset the weaker returns in the more directional strategies.

2012 is looking like another year of subdued growth in developed economies and superior growth in developing countries. Equity markets investors are expected to remain cautious despite the apparent value on offer as investors will continue to fret over growth assets in the current environment. This uncertain outlook is certainly reflected in the defensive positioning across several of the fund's underlying strategies.

BT Investment Management (RE) Limited ABN 17 126 390 627, AFSL 316 455, is the responsible entity and issuer of units in the BT Total Return Fund. An Information Memorandum (IM) is available for the Fund and can be obtained by contacting your business development representative on 1800 813 886 or visiting www.btim.com.au. You should obtain and consider the IM before deciding whether to acquire, continue to hold or dispose of units in the Fund. This information has been prepared without taking account of your objectives, financial situation or needs. Before acting on this information, consider its appropriateness, having regard to your objectives, financial situation and needs. An investment in the Fund is not a deposit with or any other liability of the Westpac Banking Corporation (ABN 33 007 457 141) or any other Company in the Westpac Group of companies.

Performance figures are calculated in accordance with the Investment & Financial Services Association (IFSA) standards. Total returns (post-fee) are calculated: to the last day of each month using exit prices; taking into account management costs of the fund; assuming reinvestment of distributions (which may include net realised capital gains from the sale of assets of the fund). No reduction is made to the unit price (or performance) to allow for tax you may pay as an investor, other than withholding tax on foreign income (if any). Certain other fees such as Contribution fees or Withdrawal fees (if any) are not taken into account. Total returns (pre-fee) are calculated by adding back management costs to the (post-fee) returns. Past performance is not a reliable indicator of future performance.

If market movements, cash flows or changes in the nature of an investment (eg a change in credit rating) cause the Fund to exceed any of the investment ranges or limits in this document, this will be rectified by BTIM (RE) as soon as reasonably practicable after becoming aware of it. If BTIM (RE) does so, it will have no other obligations in relation to these circumstances. The procedures, investment ranges, benchmarks and limits specified in this document are accurate as at the date of its issue, and BTIM (RE) reserves the right to vary these from time to time.

BT Investment Management (RE) Limited is a member of the Westpac Group. Neither BT Investment Management (RE) Limited, nor any other company in the Westpac Group, guarantees the repayment of capital or the performance of the product or any particular rate of return.
